13. International Cooperation Clause
14. Amendments & Version Control
15. Entry into Force
16. Acceptance of Terms
17. Signatures (Template)
18. Annex A — Civic Oath of Service

Preamble

The **GoudDi Free World License (GFWL)** establishes the legal, ethical, and economic architecture for all actors operating within the **GOLDA Framework** — the Global Organization for Ledger Development and Accountability — and its civic monetary rail, **GoudDi (Civic Digital Currency)**. This License affirms that money, governance, and technology converge toward *Libertas · Aequitas · Fraternitas*.

This Civic Enterprise Edition replaces charitable or purely governmental paradigms with a **Civic Enterprise Model**: a class of institution that lawfully pursues profit *only* through verifiable public value (**profit-by-proof**), never through speculation or coercion. The purpose is productive equity through proof, with outcomes that are measurable, auditable, and replicable across nations.

1. Institutional Foundation & Definitions

1.1 Civic Enterprise Custodian

GOLDA Global Inc. ("the Custodian") is a *for-profit civic enterprise* organized under applicable commercial law, serving as the founding custodian of the GFWL standard and operator of the GoudDi framework. Its fiduciary duty is twofold: **(a)** sustain operations through lawful profit derived from verified civic services; **(b)** uphold the moral and technical integrity of the standard for all licensees.

1.2 Core Terms

- **GOLDA Framework ("the Standard")**: the legal, ethical, and technical corpus governing issuance discipline, data privacy, and civic proof mechanisms.
- **Licensee**: any State, sub-state entity, institution, or civic body authorized to operate under this License and to interact with GoudDi assets.
- **Civic Digital Currency (CDC)**: tokenized unit of account and proof created under issuance discipline rules.
- **Smart Contract Architect (SCA)**: certified individual/team designing contracts consistent with the GSCM (GOLDA Smart Contract Model).
- **Civic Auditor (CA)**: certified professional verifying compliance, equity, and outcome proofs.
- **Civic Leaf**: immutable record of a verified public or civic transaction.

- **Civic Fit Test (CFT):** assessment of mission authenticity, governance transparency, and proof capacity for prospective licensees.

2. License Tiers

Tier	Scope	Authority	Primary Obligations
GFWL-S (Sovereign)	National or regional government	May mint or co-mint CDC under Custodian supervision	Issuance discipline; publish audits; respect 999:1 equity cap
GFWL-I (Institutional)	NGO, city, university, public-interest corporation	May deploy contracts using existing GoudDi supply	Pass CFT; quarterly proofs; open-audit rule
GFWL-C (Civic)	Verified community groups or individuals	May earn, spend, or design micro-missions	Civic Code of Conduct; no speculation or laundering
